When the Volunteer Worker Asks
"Will You Join the Red Cross"

Can You Answer No ?

Have
Your
Dollar
Ready.
Join
With a
Smile.
Your
Red
Cross
Needs
You.

It is your privilege as men and women—it is your duty as citizens.

TO JOIN THE RED CROSS

The Red Cross knows neither race, creed nor boundary. It stands for the brotherhood of humanity—it is the universal emblem of Mercy.

ALBERTA NEEDS RED CROSS AS NEVER BEFORE

To relieve suffering, to aid the sick, to care for soldiers and their dependents—to cope with disaster and be ready for emergencies—to promote good health and better living conditions—to extend the work of establishing rural hospital and nursing services—to care for blind, crippled and suffering children.

EVERY CHILD SHOULD BE A MEMBER OF THE JUNIOR RED CROSS

Every dollar subscribed to the Junior Red Cross is used to help and care for helpless cripples, blind and disabled children.—Let your little son and daughter proudly point to their Red Cross membership button. Junior membership Twenty-five Cents.

YOUR DUTY IS PLAIN, YOU CANNOT REFUSE MEMBERSHIP \$1.00

If by chance the volunteers overlook you, send in your subscription to:
The Provincial Secretary,
Red Cross, Calgary.

Receipt and membership button will be forwarded to you.

Enrolment Week, Nov. 5 to 12
A Crusade for Good Health

BE PREPARED

Mr. Frank Harris while working for the Gas Co. at the river last Saturday, raising some machinery, it slipped and crushed his hand very badly. He was brought to town immediately for medical attention.

Mr. and Mrs. Milroy of Medicine Hat visited with Mr. and Mrs. Holson on Friday.

Mr. Bolin and family sail for Gothenburg on the Swedish American Line Stockholm on November 25th.

The Eastbound train on Saturday was about one hour late, on account of the engine breaking down at Burdett, an engine from Taber was brought down to complete the trip.

Mr. Sherlock Doran left to attend the School of Agriculture at Raymond he was accompanied by his mother.

We regret to announce the death of Mr. J.W. Campbell, late of Victoria, B.C., he will be remembered by many in Bow Island as having farmed here some years ago, on coming to Cayley this fall to look after his crop interests he was taken ill and after a stay with his daughter following the recovery, a relapse took place and he was rushed to Calgary Hospital where he died on Friday Oct. 27th. He leaves a sorrowing wife and daughter to mourn his loss.

Mr. W.S. Hare and daughter of Maleb were Bow Island visitors over the week end and were the guests of Mrs. Chas. Avery, returning to Maleb on Tuesday.

Miss Francis Halloran spent Sunday at home with her parents.

Thanksgiving Services at All Saints' Church

Harvest Thanksgiving Services were held in All Saint's Church last Sunday by the Rev. Leacroft of Taber, with Mr. Roach at the organ who played very nice and appropriate music, for both services, which were very well attended. The Church looked very pretty with its decoration of Sheaves, Vegetables and Fruit, the Altar was very prettily decorated with large Chrysanthemums.

The Christening of the little child of Mr. and Mrs. W.S. Hare of Maleb took place in the afternoon when the child was baptised "Jessie Marian". The Christening Service was held owing to a call received by the Rev. Leacroft to visit Mr. N. Wallwork who was lying very ill at his residence down by the river. Mr. Leacroft also visited Mr. Wallwork again on Monday and administered Holy Communion to him.

The Ladies' Aid of All Saints' Church had some alterations made in connection with the Gas Heater of the Church, having a new brick chimney made outside on the south-west corner of the Church with which to carry off the fumes, instead of having the stove pipes going across the Church to the other chimney as before, this is a great improvement.

Mrs. Roach acted as Organist at the Church last Sunday in the absence of Mrs. B. Whitney, who was unable to leave her father, who was very ill.

The Rev. Leacroft christened the little baby girl of Mr. and Mrs. Holknapp on Tuesday, Ruth Elizabeth at the home of Mr. and Mrs. Hurlbut.

The All Saints' Ladies Aid met at the home of Mrs. G. Hildgen, yesterday Thursday, in the evening after the business was over the hostess served a delicious lunch.

Mr. and Mrs. Roach had the Rev. Leacroft as their guest during his stay in Bow Island, which was from Saturday evening until Tuesday noon, when he returned to Taber.

St. Michael's Church Is Crowned for Confirmation Over 100 being Confirmed

And Has One Of The Most Successful Bazaars And Supper Parties ever held in Bow Island, nearly 400 People sitting Down To The Supper.

Saturday Oct. 28th was a day that will be long remembered by many people of Bow Island and vicinity.

In the afternoon Bishop McNally of Calgary diocese entered the sanctuary of St. Michael's Church, where before confirming a class of one hundred and eight members, delivered an eloquent sermon, he touched upon the work of the Church, the duties of her members, the necessity of organizing a diocesan apostolic authority, he spoke highly of the good work done during the past few years. At the closing of confirmation he gave the final blessings with the Benediction of the Blessed Sacrament, being assisted by Rev. Father Fitzpatrick of Medicine Hat.

In the evening a Chicken Supper was served to nearly four hundred people, the quantity and quality of which would be difficult to equal. Much the Supper and the articles of display showed that the ladies of the Altar Society are a wonderful lot of workers, though few in numbers they are there with the goods. Bishop McNally was heard to remark that they would do credit to a large city parish.

Mr. F.W. Tweedie of Maleb won the Cassiopea by having the lucky supper ticket.

We congratulate the ladies of the Altar Society on their most successful Bazaar and wish them every success in their future undertakings.

St. Michael's Church

Mass will be celebrated on Sunday 5th, November at 10 a.m.

Mr. John Thornton, of Foremost left for Coleman, B.C. on Tuesday.

BOHN—to Mr. and Mrs. Bob Connor on the 1st, November a daughter.

Clarence McCallum who is under Dr. Cairns' care at the home of Mrs. Roome is we are glad to report, doing nicely.

Mr. and Mrs. W. Potter have moved into the Murray house for the winter.

Successful Masquerade Dance

The Masquerade dance was a grand affair, a big success, Mr. West Potter acted as floor manager, Mr. Hurst and Mr. Hurlbut furnished the music which was very good, and the costumes were splendid, everyone enjoyed themselves immensely.

The Board of Trade held a farewell banquet on Wednesday evening for Mr. R.N. Beattie who will be seen leaving Bow Island, about sixty-five guests gathered to bid him farewell and everyone reports it a success.

Mrs. Thomas moved into town on Wednesday to spend the winter.

Mrs. Parker and daughter Dolly left on Tuesday for Calgary.

Mr. and Mrs. J. Neil of Burdett visited at the home of Mr. and Mrs. Roach on Friday.

John McIntosh is expected here on Saturday next for a visit.

Men's Mitts, Gloves, and Overalls for Winter

Have a good line of Men's Mitts and Gloves for winter also a full line of Rubbers and Overalls at Reasonable Prices. If you need anything in this line give me a call.

Winter stock of potatoes and apples are in, get your share if you can. ROBINSON'S General Store Main Street—Bow Island

Masquerade Dance Huge Success

The Masquerade Dance held at Lansdown School on Friday last (the 27th) was a huge success. The schoolroom was crowded, many wearing Masquerade Dresses, we had a witch, and a gipsy but—some had their fortune told, also we had an Indian Squaw, a clown, a very shy maiden lady, also an elderly lady, with her hand bag and knitting, and various other dresses among which were a Policeman, an Indian Chief, and a poor old man carrying a walking stick, not great sympathy was felt for this poor old man who seemed to suffer with terrible pains in his back when he was not dancing, while the maiden lady looked as if it was her last dance, and as if she had never seen such a crowd of people before, after a time she got over her shyness and joined in with the dancing, but the most attractive figure was the elderly lady who was with her knitting, she stitched and stitched, the tangle she got her wool into was terrible, she was obliged to knit with her wollen gloves on, as her hands were so very cold, she was sure she had to many needles to work with. She had left her children home as she did not think a dance was a fit place for children, and was very glad her place mother could not see, she saw the young girls at day were dancing, (although she herself was a very good dancer), and she thought some of the dresses of the young girls were really terrible.

The Schoolroom was pretty decorated by the members of the Junior Red Cross who got up the dance. Lunch was served about eleven p.m. The "Home Sweet Home Waltz" was played about 1:30 a.m. The music was splendid by our friend Mr. A. Hill was splendid.

Public Meeting on 7th.

The local Orange Lodge are holding a Public Meeting in the I.O.O.F. Hall on Tuesday next at 8 o'clock p.m. Everybody Welcome.

Mr. G.H. Wiley moved into town last week having rented their farm for two years.

Mr. Blaine has bought the Nelson Block at Taber where he is intending to open up his drug store.

BOHN—to Mr. and Mrs. John Ley of Sunnyside on October 27th, 1922 a daughter.

BOHN—to Mr. and Mrs. G.H. Rednapp of Pleasant View on October 28th, 1922 a daughter.

BOHN—to Mr. and Mrs. M. Goldreich of Bow Island on October 31st, 1922 a daughter.

BOHN—to Mr. and Mrs. F. Hurlbut at all at the home of Mrs. J.F. Hurlbut.

Mrs. Oscar Weisling was in town on Saturday to see Dr. Cairns, and on Wednesday Dr. Cairns was called in and found it necessary to lance the breast, which was causing the trouble, we sincerely hope she will soon be better.

Bad Accident to Little Boy

On Saturday last the little boy age 3 1/2 years, son of A. W. Chandler (chickadee) while playing in the house slipped and in falling ran a school ruler into his throat, causing a nasty wound, Dr. Cairns being out of town, Dr. McNeil was called and stitched the wound and the little boy is getting on so well as can be expected.

NOTICE

NOTICE IS HEREBY GIVEN that a petition has been presented to the Council of the Town of Bow Island under the provisions of the Early Closing Act praying for the passing of the following Closing By-law:

BY-LAW NO.

A BY-LAW OF THE TOWN OF BOW ISLAND TO PROVIDE FOR THE EARLY CLOSING OF SHOPS IN THE TOWN OF BOW ISLAND.

WHEREAS pursuant to the Early Closing Act a petition has been presented to the Council of the Town of Bow Island signed by the occupiers of certain retail shops in the Town of Bow Island requesting the Council to pass this By-law.

AND WHEREAS it appears to the Council that at least two-thirds in number of the occupiers of the shops to be affected by this By-law have signed this said petition.

AND WHEREAS due notice of the intention of the Council to pass this By-law has been given in the manner and form prescribed by The Early Closing Act and the regulations thereunder.

NOW THEREFORE THE COUNCIL OF THE TOWN OF BOW ISLAND

DOETH AS FOLLOWS:

1. That all retail shops of the following classes that is to say Groceries, Hardware, Dry Goods, Boots and Shoes, Gen's Furnishings and Satcher in the Town of Bow Island shall be and remain closed on each and every Monday, Tuesday, Wednesday, Thursday and Friday from and after the hour of six o'clock in the afternoon of each of the said days until the morning of the following day and on each and every Saturday from and after the hour of ten o'clock in the afternoon.
2. That during the month of June, July and August all retail shops of the classes mentioned in paragraph one heretofore in the Town of Bow Island shall be and remain closed on each and every Wednesday from and after the hour of one o'clock in the afternoon until the morning of the following day.
3. That no retail trade or business shall be carried on within the Town of Bow Island after the hours mentioned in the preceding paragraphs hereof where under the provisions of this By-law it would be unlawful at such time to keep open a shop for the purpose of carrying on any such trade or business.
4. That where several trades or businesses are carried on in the same shop and this By-law does not apply to any one or more of such businesses or trades, such shop may be kept open after the closing hours herein mentioned for the purpose of those trades or businesses not affected by this By-law, provided that provision is made so that the portion of the shop wherein the trade or business affected by this By-law is carried on is not open to the public after the closing hours herein mentioned.

NOTICE IS HEREBY FURTHER GIVEN that objections to the petition presented to the Council praying for the passing of such By-law on the ground that such petition is insufficiently signed or otherwise affecting the validity in sufficient degree must be filed with W.A. Bateman, Secretary-Treasurer of the Town of Bow Island on or before the 15th day of November A.D. 1922; and that if no such objections are filed before the said date the Council will forthwith proceed to pass the said Closing By-law.

W. A. Bateman
Secretary-Treasurer,
Town of Bow Island

TEA is good tea

Don't make you enjoy life

Canada's Place In The World

Referring to the position which Canada occupies as a producer of wealth, F. C. Wade, Agent-General for British Columbia in London, has said: "Canada has only one-half of one per cent. of the population of the world. She produces 56 per cent. of its cotton, 38 per cent. of its asbestos, 45 per cent. of its nickel, 32 per cent. of its pulpwood, 20 per cent. of its lumber, 20 per cent. of its cured fish, 18 per cent. of its oats, 16 per cent. of its potatoes, 12 per cent. of its silver, 11 per cent. of its coal, 11 per cent. of its barley, 1 per cent. of its gold, 4 per cent. of its copper."

Contemplation of the fact that with only one-half of one per cent. of the world's population, Canada is already contributing so largely to the world's wealth, coupled with the further fact that, as yet, and owing to lack of population, the enormous wealth of natural resources which the Dominion possesses have barely been scratched, should convince even the most pessimistic of the great future in store for this country.

These figures, however, only begin to tell the story of Canada's present position. Last year Canada's exports to foreign countries reached a total of \$400,000,000, and more than 50 per cent. of this total was made up of "fully or partly" manufactured goods, thus demonstrating that, to an ever increasing extent, the raw materials produced in the Dominion are being utilized in our own factories and shipped abroad in a finished or partly finished condition instead of in their raw state.

At the recent meeting of the General Assembly of the League of Nations an official declaration was made naming the six most important nations in the League, outside the Allied powers of Great Britain, France, Italy, Japan, etc., and Canada was accorded a foremost place among these six.

If this is the position now occupied in the world's estimation and in world commerce and economies by a young and only partially developed country of only eight millions of people, what a wonderful future and position awaits the Dominion when, with several times its present population, and the more complete settlement of its lands and more intensive development of its resources, its representatives sit around the council board of the world!

A realization of Canada's present position, and the growing possibilities of the future, only serve to emphasize the importance and need of now bending all our energies to the task of encouraging immigrants of the right type from all parts of the world to come and assist in the work of nation building in this Dominion. What immigration did for the United States in the last century, it can do for Canada in this century.

The late Sir Wilfrid Laurier once declared that the Twentieth Century belonged to Canada. The Great War delayed the fulfillment of that prophecy, but it was only a temporary interruption, and the final result may well be that, with careful and energetic management, the conditions following the war may be turned to Canada's advantage.

This Dominion needs immigration of a two-fold character, people and capital. Young men and women, healthy and ambitious, are required to settle on our vacant lands; youths are needed to engage in the production of wealth from our forests, our fisheries and our mines; laborers will be needed to build railways, roads and various government and municipal works; capital is required to make possible development and provide employment for these people. The one cannot get along without the other.

The foundation stone of all our nationhood should, therefore, be the encouragement of the right type of immigrants, and the providing of all reasonable inducements and guarantees to foreign capital to engage in the task of building up a great and prosperous Canadian nation, and to the great enterprise the Canadian people, East and West, should unitedly devote their best energies.

Children Cry for Fletcher's

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for babies. Remedies primarily prepared for grown-ups are not interchangeable. It was the need for a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that is its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrup. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulence, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort--The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher
In Use For Over 30 Years

THE CASTORIA COMPANY, NEW YORK CITY

Britain Still Leads

Relative Strength of Shipping Tonnage of Leading Nations

The new edition of Lloyds's Register of Shipping contains some illuminating figures on the relative strength of the shipping tonnage possessed by the various nations. The figures are really striking, and indicate that, while Great Britain has increased her tonnage only in a slight degree, the United States has made tremendous strides. The advantages gained by the latter nation in a position to successfully compete with Britain for the mastery of the world's trade. If tonnage alone counted in the development of a vast commerce, the United States would be in a position to threaten the present supremacy of Britain on the seas.

There are altogether 33,945 seafaring vessels in the world, and their total tonnage is 41,370,756. Of this number, 4,680 vessels are sailing vessels aggregating 3,037,341 tons and 29,255 are steam and motor ships of 51,242,552 tons. Great Britain heads the list with 19,053,000 tons, an increase of only 176,000 tons since June, 1914; the United States comes second with 12,506,000 tons, an increase of 10,829,000 tons since 1914.

In 1914 Germany ranked second to Great Britain with 6,000,000 tons, while now she possesses only 1,782,000 tons. Norway has descended from third place to seventh, and Japan has risen from sixth to third position.

MANY TROUBLES COME THROUGH THE BLOOD

If Kept Rich and Red Good Health Will Be Yours

Nearly all the common diseases are caused by blood impurities. Bad blood is the cause of headaches and backaches, humors, and rheumatism, skin diseases and other nerve troubles, debility and indigestion, neuritis, sciatica and other nerve troubles. It is bad blood that causes disfiguring skin diseases like eczema and psoriasis, rheum, pimples and eruptions. The severity of the trouble indicates how impure the blood is. It does not come from bad to worse unless kept impure. It can be kept pure by purifying the blood. There is no use trying to find other medicine for each trouble, for they all come through the one cause--bad blood. In conditions of this kind, Dr. Williams' Pink Pills have been found very beneficial, as they cleanse the blood, enrich and purify it. That is why, after other remedies have failed, they reach the root of the trouble. Dr. Williams' Pink Pills, which contain the blood-making principle, will give you a new blood. "I was in a bad way," says a woman, "my blood was poor, I had no appetite and my work was no longer my pleasure. I was in a miserable condition. I was taking medicine, but it did me no good. At this stage a friend who had taken Dr. Williams' Pink Pills, with beneficial results, advised me to take them, and acting on his advice I did so. The result can be summed up in a few words: I took the pills for a little more than a month, and I can honestly say I never felt better in my life. My blood is now strong and my work with comparative ease, and I have gained in weight. I advise you, if you have a poor blood, to give these pills a fair trial."

You can get these pills through any medicine dealer or by mail at 50 cents a box. Write for a free trial to Dr. Williams' Medicine Co., Brockville, Ont.

Long-Lived British Industry

British Manufacturers Maintain High Standards in Spite of Strong Temptations

The capacity of British engineering productions to withstand many years of hard work is proverbial. British manufacturers have maintained their high standards in spite of the strong temptations of competition with inferior goods which are claimed to be just as good. In keeping up this standard these firms are maintaining a very ancient tradition. A short time ago some rolling mills in the North-east of England were dismantled. These mills were established in 1691, and the old rolls and other machinery are still in existence. The water wheel employed in bygone days to drive the machinery is also still in working order. It was, as a matter of fact, used by the dismantling firm to operate the hoists in cutting up the scrap iron derived from the works.

Dr. William Forke, the mission doctor of Labrador, has arrived at Liverpool. Descending to a London Daily Mail reporter the arrival of a small quantity of radium for the relief of cancer sufferers in his hospital, he said there was much excitement among the Eskimo patients and they were greatly surprised to see it arrive in an envelope by post.

Don't be afraid to speak the truth; it is harmless though not guaranteed to be especially pleasing.

W. N. U. 1442

NEW LAMP BURNS 94% AIR

Beats Electric or Gas

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U.S. Government and 25 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise--no rattling up. Is simple, clean, safe. Burns 94 per cent. air and 6 per cent. of kerosene.

The inventor, T. V. Johnson, 679 McDevitt Ave., Minneapolis, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first person in each locality who will help him introduce it. Write him today for particulars. Also ask him to explain how you can get the secret, and without experience or money make \$250 to \$500 per month.

For Once He Was Wrong
"This hotel," declared the clerk proudly, "is run on the theory that the guest is always right."

"Fine," declared the man who had been there a week. "I don't owe you a cent!"--American Legion Weekly.

MOTHER!

Clean Child's Bowels with "California Fig Syrup"

Even a sick child loves the "fruit" in "California Fig Syrup." Little trouble is caused, or if your child is listless, cross, feverish, full of cold, or has colic, a teaspoonful will never fail to open the bowels. In a few hours you can see for yourself how thoroughly it works all the constipation out of your child's system and gives you a well, playful child again. Mothers who keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup," which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you get an imitation fig syrup.

Good Habits to Form
Get the habit of economy but not stinginess.
Get the habit of always hoping.

A Visit to the Old Land

Canadian Pacific Through Service for Old Country Christmas and New Year Travel

For the accommodation of Christmas and New Year visitors to the Old Country, the Canadian Pacific Railway will operate special tourist sleepers from Edmonton, Calgary, Saskatoon, Moose Jaw and Regina, to connect with special trains from Winnipeg 5:30 a.m. on Saturday, December 5th, operating through to the ship's side at West 6th, John, for the sailing of the "S.S. 'Tunislan'." December 12th.

Special through tourist sleepers will also be operated for other December sailings as follows:
For the S.S. "Tunislan" to Liverpool, sailing from St. John, December 1st. Through tourist sleepers from Calgary, Moose Jaw and Regina, December 27th, and from Winnipeg, December 28th.

For the S.S. "Victorian" to Glasgow, sailing from St. John, December 7th. Through tourist sleepers from Calgary, Moose Jaw and Regina, December 3rd, and from Winnipeg, December 4th.

For the S.S. "Hollis" to Southampton, sailing from St. John, December 9th. Through tourist sleepers from Calgary, Moose Jaw and Regina, December 5th, and from Winnipeg, December 6th.

For the S.S. "Montclair" to Liverpool, sailing from St. John, December 12th. Through tourist sleepers from Edmonton, Calgary, Saskatoon, Moose Jaw and Regina, December 8th, and from Winnipeg, December 9th.

For the S.S. "Metagama" to Glasgow, sailing from St. John, December 15th. Through tourist sleepers from Calgary, Moose Jaw and Regina, December 11th, and from Winnipeg, December 12th.

This service will enable those desiring to visit the Old Country, a direct through service on the Canadian Pacific, eliminating the changing of trains and transfers. Any Canadian Pacific Agent will gladly furnish particulars of sailings, rates, etc., obtain passports and arrange reservations on through sleepers.

The Western Harvest
One can look at the western harvest from any point he likes, but the fact remains that there are half a billion dollars of new money due out of the earth. That ought to "treatly" help business--Mullins Free Press.

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be got if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system. It afterwards the child's baby, and will be undisturbed. The powders cannot injure the most delicate infant, and there is nothing so effective for restoring the health of a worn woman.

Alberta Homestead Lands

8,000,000 Acres Available for Entry in the Edmonton District

From figures given by a man issued by the Federal Department of the Interior, there are 50,311 quarter sections or over 5,000,000 acres available for entry in the Edmonton district of the province of Alberta. These lands are situated in the districts north, west and southwest of Edmonton, and largely within a radius of from fifty to one hundred miles. In addition there are millions of acres to be had in the Peace River and Grande Prairie sections of the province. Some 42,577 quarter sections are available for settlement in the country north of Edmonton.

The paper money issued by Lobejahn a small town in Saxony, has evidently been designed by a humorist. On it is a picture of a man displaying his empty pockets.

You Can Get Back Your Grip On Health

A statement that will be of much concern to thousands of people in Alberta was made recently by William Williamson, a Veteran of the World War, residing at 215 Trent St., North-East, Calgary.

"I believe in giving everything its due," he continued, "and I want to say right now that I soon found myself Tanlac too highly for what it has done in my case. For some time I had been in a bad run-down condition. I had absolutely no appetite and had fallen off seventeen pounds in weight. My nerves were all undone. I could not get sufficient rest at night and got up mornings feeling as tired as when I went to bed. I was also bothered a great deal with rheumatism in my legs and ankles, which would often get so stiff and sore I could not walk without great pain."

"So much," was being told in the papers about Tanlac that I went to a druggist friend for advice. He assured me that Tanlac was good, as I began taking it and soon found myself wonderfully improved. After taking a few bottles my troubles all disappeared and I found I had regained fifteen pounds of my lost weight. I am now enjoying splendid health and do not hesitate to recommend Tanlac to anyone."

Tanlac is sold by all good druggists.

In every way
Safe, sure, silent, harmless to children, harmless to mothers with nursing babies with safety in every way. Best in every way. **WILLIAMS' PINK PILLS**

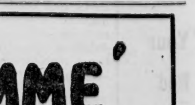

Teaching Women to Vote

A school for women where they may be instructed in the duties and responsibilities of voting, has been conducted during the summer at Oxford, England. So many applications were received that some had to be turned away. The course made a specialty in the duties of magistrates.

Canada's Potential Wealth And What It Means To The United States

Paul H. Russell, Vice-President of the National Bank of Commerce of New York, writes:

"Clearly, trade between Canada and the United States is vital to their material prosperity, yet despite the vivid general interest in foreign trade in this country during recent years, Canada is practically ignored in current discussions of trade relations."

In the past fiscal year Canada bought of the United States three times as much as did all South America, and as much as France and Germany together. The Dominion, as a customer, is second only to the United Kingdom. Yet our second best customer is virtually ignored at Washington.

To quote Mr. Russell further:

"Never before have there been two countries practically identical in speech, customs, government, and areas of life and conditions of production, with 3,000 miles of boundary line, and most of the natural lines of trade crossing this boundary."

Consider the conditions. In all history it is unique. Our publicists lament the cross-current lines of custom duties that divide Canada naturally. Yet our Washington tariff makers are heightening the impenetrable wall against our own friendly, productive and potentially rich neighbor to the north. Let us cut the beam out of our own eyes for we see null at the mirror in Europe's eye.

Canada today faces a future comparable with the present of the United States. Capitalists consider it as one of the most favorable lands for investment on earth. The Government functions well, the people have character, the physical endowments are superlative. The Dominion has unmatched coal and iron, fisheries, lumber that will be made a permanent asset by sensible conservation. It possesses one-half of the world's known supply of nickel, and has two hundred and fifty million acres of available soil awaiting the plow. Economically, Canada has become to us, what our own Great West was to our grandfathers—cheap and more. As for waterpower, Canada has so much that certain regions are bound one day to become great manufacturing areas.

As for agricultural competition, it is no more exists than between Minnesota and Wisconsin. The experience with our European neighbors in 1921 shows that agricultural prices in Minneapolis are not affected by those in Winnipeg. Between the province of Manitoba and the Dakotas there is as good reason for free trade as between Minnesota and the Dakotas.

Mr. Russell, with good reason, states that "a widespread understanding by the people of both countries should lead to trade policies that are based on medieval concepts as are the three thousand miles of unguarded boundary from the congested nationhood which this extension in the unbearable burden of modern armaments."—Minneapolis Journal.

Small-Town Fire Engine

Tandem Bicycle With Pump Attach-
ment Proves Fire Engine

What might be described as a double tandem bicycle with four wheels arranged like those of a wagon, and four seats for riders, two in front and two behind, and carrying a hose reel, rotary pump, etc., was exhibited recently in Paris. The machine is intended as a fire engine in small towns. When the scene of the fire is reached the pedals are thrown into gear with the pump, the hose is unrolled, and the riders, rearing their seats, work the pump by means of the pedals. It is claimed that this machine can outstrip any fire engine drawn by horses on the way to a conflagration, and that its pump is at least as effective as the hand engines used in many towns.

Where Women Live Long

Take a map and draw a ring round the villages between Chichester, Midhurst, Petworth and Arundel in West Sussex. Within that area which contains the oldest and most wooded tract of country in our island, where women are reputed to live longer than anywhere else in the world. The longevity of the women of West Sussex is being quoted extensively in America.—London Sunday Pictorial.

Counsel—What is your age, madam?

Witness (testifying)—"I have been twenty-three summers."

Counsel—"How many years were you blind?"

W. N. U. 1449

The Psalm of Canada

Story of the Christening of a United Canada

The following story of the Dominion's christening is said to be authentic:

When it was decided to unite all the interests of Canada under one government in 1867, there was much discussion as to the name under which the united government should be known. Those who met in the cabinet made different suggestions, but none was well enough. One of the members (Sir Samuel L. Tilley) read that night the 122nd Psalm, and when he came to the eighth verse he said to himself: There is the name for Canada! The next day he called attention to the Psalm, and he called attention to the geographical position of Canada, literally, from sea to sea, and from the river (St. Lawrence) to the end of the earth, as far as the eye extends. The suggestion was agreed to with one accord, and the new Canadians have since then been christened after the 122nd Psalm the Psalm of Canada.

Gypsy Band in Every Village

Depth of Expression Is Found in the Song

Nowhere but in Hungary are found so many musicians who play without being able to read music. It is to the gypsies that the world owes its appreciation of the true Magyar music. Legend, the historian, says: "The Hungarian gypsy has a certain wild and original feeling in his music that no other European has."

In every village there is a gypsy band, and these bands are the instruments most used. Their music was created by the Hungarians for the proper rendering of their emotions. It is used to accompany the violin. What the banjo is to our Negro, the cimbalom is to the Magyar.

In her essay on "Hungarian and Slav Music," Helen Ware says: "The gypsy has a certain wild and original feeling in his music that no other European has."

Why Go to College

Good Education Increases Chances for Success

There's a lot to be said on both sides of the college question. It is true that you can find college graduates in all, and boys who never were seen the inside of a schoolhouse sitting in the seats of the mill, but that isn't the real point. Dean Farrell, of the University of California, says: "We have no reason to question his figures, that: 'An American with no schooling at all has one chance in 150,000 of becoming a millionaire. With a high school training he has eighty-seven times as good a chance. With a college education he has 700 times as good a chance.'"

Going to college, for most boys, means a few years of hard study and penny-pinching, but if it increases the chances for success 700 times, you have the answer to the question. Why, indeed, shouldn't the boy go to college even if it involves some sacrifice on his own part and some on the part of his family.—From Farm Life.

Superannuation Scheme in Alberta

The new superannuation scheme of the Alberta Government, which has been in effect since July 1, has now advanced in actual operation to the point of passing on a list of 10 members of the civil service who have retired on either the annuity or lump payment plan, the latter applying in cases of less than 10 years in the service.

Under terms of the Superannuation Act, the minimum annuity is on the basis of \$20 per month.

Motor Trail Through Rockies

The Banff-Windermere motor road has been traversed for the first time. Recently the Chief Engineer motored from Banff to Invermere in 7 hours, a distance of 161 miles. This provides another link on the all-Canadian motor trail through the Rockies. Next year the entire highway will be completed. It is believed.

Toad Is a Glutton

In twenty-four hours a toad consumes an amount of food equal to four times the capacity of its stomach.

Mexico at one time included all land from Panama to Vancouver Island.

To Rid World of Scourge

Launched to Educate Public on Initial Stages of Cancer

Education of the public regarding the initial symptoms of cancer that it may be detected in its earliest stage is the aim of the American Society for the Control of Cancer, which is concentrating its efforts on National Cancer Week. Cancer is the oldest disease of mankind, says a statement issued by the society. Description of conditions now known to be cancerous are found in the fragmentary records of ancient India and Persia. It was known to the Egyptians before the time of Moses and is distinctly mentioned in the Papyrus Ebers 1600 B.C., the statement says, which adds that Herodotus told of Democedes' cure of Atossa, daughter of Darius, King of Persia, of a cancer of the breast, 530 B.C., while Daniel was a captive in Babylon.

The public generally, regards cancer as a new disease and with the offer of thoroughly disflattering allusions to the score and in structing them on detection of the scourge, the society is conducting a national cancer week.

Statistics prove that one woman in every eight, who is more than 40 years of age, dies of cancer, says the statement. Three out of every four women as men die of this dread disease between the ages of 35 and 45 years. From that time on, the ratio is more nearly equal. All physicians and surgeons, who have made a particular study of cancerous growths, are in the opinion that cancer is curable if treated in its initial stages, before they extend to inaccessible regions. Another fact on which all are agreed is that it is neither hereditary nor contagious.

Curious Lake in Ireland

Any Substance Sunk in Its Waters Becomes Petrified

What is undoubtedly one of the most curious lakes in the world is to be found in Ireland. This lake has the power of petrifying any substance that may fall into it.

Of course, the petrification is not absolute, but the substance is coated with a layer of stone, which is found dissolved in the lake, and the stone then hardens and forms a shell over the substance.

A well-known English cutler firm heard of this and sent a man over to inspect it.

He selected several pieces of hard wood, which he soaked with weights, and then marked the places with small nails.

A fortnight later he returned and took up two pieces of the wood, which he found to be partly petrified.

Two weeks after he drew up the other pieces and found each piece to be as hard as flint.

The firm then made several experiments with success. They found that at a certain stage of petrification an excellent razor hone could be manufactured from it.

Value of Canadian Milling

In a recent statement made by Hon. J. R. Robb, Minister of Trade and Commerce, Canadian milling has first place in the manufacturing industries of Canada with a production value running into \$250,000,000 annually. With the exception of about \$3,000,000 worth of stocks, bonds and securities, all the stock in this industry is held in Canada.

But—that's the fourth umbrella I've lost in six months.

Did—Your overhead expenses must be terrible.

PICKING STRAWBERRIES IN WESTERN CANADA IN SEPTEMBER

The above cut shows a portion of a crop of strawberries picked on the eighteenth of September, 1925, from a field of ever-bearing strawberries set

Owned In Common

Fiji Islanders Work on the Communal Principle

There is no private ownership of property in the Fiji. If a man wishes anything from another he must for it said, according to Fijian custom, his neighbor must give up—whether it be a pig, a goat—the native stage argument that hangs from the waist or a spear.

Every Fijian is an individualist. All work is done in common, and the result of the work divided equally among all. If a man's house has been burned he reports to his chief that he needs a new one, and the chief assigns a certain number of men to build it.

The tribal chief theoretically owns no personal property. But he is considered to own the bodies of all members of his tribe and all their possessions. Formerly he had the power of life and death. Now, though the British have done away with this, he still controls his people's property and labor, and is their judge and administrator.

Flour In Making Watches

Use Dough for Holding Small Parts For Examination

Two barrels of flour are used every week in making watches at a well known factory, which turns out from 2,000 to 2,000 watches a week. Since a baker uses about three pounds of flour to five loaves of bread it follows that for every watch the maker uses the equivalent of almost a third of a loaf of bread.

The dough is used to hold small parts, screws, rivets and other small parts. Each man in that part of the business has a lump of dough always at hand; and when he wants to examine a screw he takes the piece of dough on it. Then, turning it over, he has a good chance to look at it with the watchmaker's microscope eyeglass. Many of the screws are too minute to pick up easily with the fingers, and many more, though large enough to be picked up, would be so covered by the fingers or the forceps as to be almost hidden from sight.

Early Electric Light Bulbs

Were Constructed With the Point of the Bulb Upward

When Thomas A. Edison first produced light by electricity all of his experiments were conducted with the point of the bulb upward. As it occurred neither to Edison nor to the men who were associated with him that any light could be handled successfully unless the flame were allowed to ascend. Although Edison genius had succeeded in producing light by electricity, the inventor's every day familiarity with the common gas jet with its ascending flame-blind him for a time to the fact that his new light could be produced with the lamp in any position.

Thus were all of the early electric chandeliers constructed in such a way that the individual bulbs could be set upright in their sockets.

May Build Palace of Labor

The Boholians are projecting a great Palace of Labor in the heart of Moscow, with a central hall holding eight thousand people, and four smaller halls, while the Tower will be the main entrance. To build this will be necessary to pull down the famous Continental Hotel and Testova Restaurant, and six blocks of houses. No doubt the preliminary part of the programme will be accomplished all right.

Shelter Belt Planting, Live Stock Profits And Successful Farming Measures

(By J. G. Rutherford)

Every experienced feeder knows, and every farmer should know, that stock will not thrive or lay on flesh when constantly exposed to the winter winds of our western prairies. On the other hand, it is well established that if afforded adequate protection from the winds, livestock can be profitably fed to a finish in the open, even in our coldest winter weather.

I am quite aware that this statement may be questioned by persons lacking actual experience, but definite proof of its truth is fortunately available from many different sources. Reference may be made to the work in this line carried on at the Brandon Experimental Farm (especially during the incumbency of Mr. James Murray, now District Representative at Medicine Hat for the Alberta Department of Agriculture); to the experience of covering many years of Messrs. R. J. Phipps, of Moonbeam, Saskatchewan; W. F. Puffer, of Lacombe, Alberta; and Harry Mullins, of Winnipeg; Mr. Grayson, of Newdale, Manitoba; and many others too numerous to mention.

Even the bareground, we come to the garden, and it is surely needless to say that on the half-bred prairie a good windbreak is essential to the well-being of the garden.

Shelter from the wind, and reasonable care, the gardens of the prairie provinces are as good as any found anywhere. All the standard vegetables and small fruits flourish in abundance, while as for flowers, the old-fashioned favorites of one's childhood and the most modern varieties, as these are introduced, respond readily to the rich soil, the warm sun and the mild atmosphere of the cold-belt shelter belt.

When properly laid out, trees also effectively prevent those vast accumulations of snow which, during the winter storms, often surround and even smother or less completely cover farm buildings, thus not only saving much extra work, but allowing the yards to dry out much more quickly in the spring.

When endeavoring to acclimatize field corn in Western Saskatchewan and Alberta, where, owing to high altitudes, cool nights and battering winds, it was for long difficult to obtain home-grown seed, the writer on one occasion fortunately planted a small field lying south of an excellent shelter belt of Manitoba Maple and Russian Willow. This corn did wonderfully well, producing 17½ tons to the acre, as against an average of somewhat less than 8 tons, when grown in the open.

Subsequent similar experiences led to my planting sunflowers in the corn field for shelter purposes, as the sunflower grows more rapidly than the corn, is less affected by winds and chinch bugs, of the right variety, a somewhat greater height. Four rows of sunflowers were planted to every twelve rows of corn; the prevailing winds being north and northwest, rows ran east and west. The result was very interesting, the rows of corn immediately south of the sunflowers being the best. The result was very light, with each succeeding row markedly shorter until the next sunflower shelter was reached, when the same condition was again observable. In fact the whole corn crop presented a succession of southerly slopes.

divided by the strips of sunflowers.

It will be observed that without specially mentioning the fact we have got away from the buildings and into the open fields. There also the shelter belt is a most important factor, not only in protecting growing crops and stock from winter winds, but also in preventing the fatal soil drifting, which, of recent years, has done such widespread and in many cases irreparable damage.

It is a much more serious and expensive undertaking to provide wind breaks for an entire farm, than it is to plant the sheltering trees necessary to protect the small area occupied by home buildings and garden. Nevertheless, while other agencies may also be of value, it is Nature's safest and surest way of holding things down where they belong. As one southern prairie farmer it is a pressing question today and will be in many even more so next year and after, to whether the Tower belt shall come or the farm shall go, either on the wings of the wind, or for what it will fetch, less the human already gone.

Sorting Weeds From Wheat

New Machine That Is Said to Successfully Remove Weed Seeds

Weed seeds that comprise from two to 18 per cent. of the total bulk of wheat as it is harvested, are now successfully removed by a machine developed by the United States Department of Agriculture.

The new machine, called a "weed-eater," consists of 15 aluminum disks set 2½ inches apart on a shaft rotating at 60 revolutions a minute. Each disk is slotted with a large number of undercut pockets, that act as sorters. Three sizes of pockets are used for making the separation. In operation, the fine seeds are discharged into bags on one side of the machine and the cleaned wheat into bins or wagons.

In one test, grain containing up to 38 per cent. of weed seed was passed into the machine, reappearing as cleaned wheat, without visible traces of foreign grains.

Search For Missing Link

Expedition to South Pacific to Hunt For Trail of Wild Men

Captain Edward A. Sallabury, scientist and explorer, is en route for the Malay peninsula, where he will search for what has been termed in science "the missing link."

Captain Sallabury and rumors had crossed the Pacific Ocean from time to time about a tribe of wild men in the jungles of the Malay Archipelago, who had short, vestigial arms, and the report said, their foreheads receded and their brow ridges protruded, after the manner of the apes. The expedition, the object of the expedition is to investigate the source of these reports in the Malay Peninsula, and in his most primitive form.

Russia a Scrap Heap

All Machinery Has Deteriorated Under Regime of Soviet

Scrap and other German ironworks have concluded arrangements whereby Russia will furnish them with millions of tons of iron scrap. Russia can provide unlimited quantities of this material. In part it consists of out of date guns and other weapons, but rails, bridges, ships, locomotives and factory machinery, which were in good order at the time the revolution broke, have deteriorated so much during the Soviet regime that they are useless except as raw material. Russia has become a gigantic scrap heap.

Age Not a Matter of Years

Age counts for much less than it did a generation ago. People do not submit so readily to the growing-old process. They are realizing more and more that youth is not a physical affair at all. The new psychology, which is quietly, but deeply, affecting human thought in many directions, is teaching men that health, labor, cheerful thinking, and useful interests in life go a long way towards preserving fitness and freshness of body and mind.—Cape Argus (R. Africa).

Didn't Have Useful Reason

"Mrs. White was late at church this morning," remarked one woman. "Yes," returned the other, "I wonder why. She didn't have an anything new."—Boston Transcript.

You may hear the hint with greater tranquility if you will reflect that the worst and most vicious mosquitoes are found in the frozen north.
